

Defend Your Margins with Smarter Operations

Stay Profitable with Real-Time Inventory Insights

Unlike other platforms, Flooring OS ensures you're maximizing your inventory before placing unnecessary orders. For example, instead of automatically ordering new glue for an installation, our system checks existing inventory levels first—saving money and improving margins.

Protect Your Margins with Dynamic Pricing Updates

Quoting a job today doesn't mean losing margin tomorrow. If your customer revisits a quote weeks later, Flooring OS alerts you to product price changes and allows for immediate updates. This ensures your margins are preserved, even in a volatile pricing environment.

Flooring OS

Customers First

Turn Challenges into Opportunities

Real-Time Inventory Tracking

Avoid over-ordering and maximize existing resources.

Dynamic Quote Updates

Stay ahead of fluctuating supplier costs to defend your bottom line.

Seamless Workflow

Smarter processes mean better profitability—every step of the way.

Discover how Flooring OS
protects your profits.
